

April/May 2016

George's Hill and Platte River Collaboration

We've been putting our heads together with our American friends thinking about what we readily throw away.

Using Google Classroom and Google Docs we discovered that in both Ireland and America we throw away the same things paper, plastic, bottle tops, toilet roll inserts, packaging, cardboard, milk jugs, tinfoil to name but a few things.

We decided to try to up cycle some of these items and make them into something new, fun and useful!

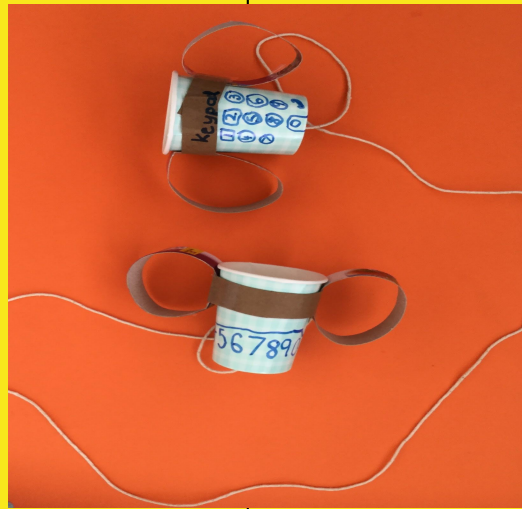

What could these be?

Our model Dublin Denver is wearing a high fashion multicoloured dress made from cardboard, plastic bottles and left over art paper

A telephone ring ring ring ring...

A racing car, vroom vroom...

Alfred the puppet

To Infinity And Beyond!
